For Cod's Sake

The cod is back in the Baltic Sea... Is it really?

'For Cod's Sake' is an international documentary about the fate of the Baltic Sea cod. For years the stock has been declining. Finally, a small recovery has been noted, but scientist disagree about the extent of the recovery. Is the cod really back - or is a wipe-out still imminent?

Chalk - Rügen, Germany

Captured at Rügen near Sassnitz. You can see what happens to the chalk and how the island is getting smaller.
